PROFILE

Python back-end developer at Gestiona Sistemas. Double Degree in Computer Engineering and Business Administration from the University of Granada, now studying for a Master's in Research in Software Engineering and Computer Systems at UNED, focused on cybersecurity, Linux systems administration and server infrastructure. Experience deploying high-availability web services with Docker, Nginx and iptables, and building a cybersecurity tool based on generative AI (final degree project). PCAP certification (Cisco).

PROFESSIONAL EXPERIENCE

Back-end Developer — Gestiona Sistemas | Internship contract, remote | Sep 2026 – present

- REST API development in Python (Flask, Pydantic) on PostgreSQL, with SQLAlchemy and versioned migrations in Alembic.
- Language models integrated in production (Claude API): structured output validated against a schema, with retries on the model response.
- Hexagonal architecture, testing with pytest and continuous delivery on Bitbucket Pipelines; ticket-based work in Jira with code review.

PROJECT EXPERIENCE

Ciber-AsesorIA — Technical Measures Subsystem (ST) | Final degree project, UGR

- Compliance assessment engine (ENS, NIS2, DORA) modelled as a knowledge graph in Neo4j, with an inference engine written in Cypher.
- LLM-based conversational agent (Ollama, LangChain) with automatic answer validation (LLM-as-judge).

Radar España | Personal project, in production | radarespaña.es

- Live map of Spain's trains, metros and emergencies: 53 open data sources (GTFS-Realtime, DATEX II) and a rules engine that raises alerts. Over 200,000 views on X.
- Node.js with hexagonal architecture, Docker behind Cloudflare and zero-downtime deploys.

EDUCATION

Double Degree in Computer Engineering and Business Administration
University of Granada | 2021 – 2026

Master's Degree in Research in Software Engineering and Computer Systems
UNED | 2026 – 2027 (in progress)

CERTIFICATIONS AND FURTHER TRAINING

PCAP: Programming Essentials in Python and Introduction to Cybersecurity — Cisco | 2020 – 2021
MOOC on Free Software and MOOC on Machine Learning and Big Data for Bioinformatics — UGR | 2021 – 2022
Aptis ESOL International Certificate, level B1 — British Council | 2026

TECHNICAL SKILLS

Systems and infrastructure: Linux (Bash), Docker, Docker Compose, Nginx, HAProxy, load balancing, high availability, CI/CD (Bitbucket Pipelines, GitHub Actions), Cloudflare
Cybersecurity: Perimeter security with iptables, HTTPS/SSL (OpenSSL), compliance assessment (ENS, NIS2, DORA)
Back-end development: Flask, Pydantic, SQLAlchemy, Alembic, APScheduler, hexagonal architecture, REST APIs
Languages and databases: Python, C++, SQL, Cypher, HTML/CSS · PostgreSQL, Neo4j (graphs), Supabase
AI and data: Generative AI (Claude API, Ollama, LangChain), structured output, prompt engineering, Pandas, Statsmodels
Performance and testing: Apache Benchmark, Locust, pytest, Ruff
Methodology: Git flow, code review, conventional commits, Jira, Confluence, agile development

LANGUAGES

Spanish — Native | English — B1 (Aptis ESOL, British Council)
